

GREATEST COMMON DIVISOR

Aim

To find the Greatest Common Divisor (GCD) of two numbers using RAPTOR.

Algorithm

1. Start.
2. Read two numbers a and b.
3. Repeat until $b = 0$:
 - remainder = $a \bmod b$
 - $a = b$
 - $b = \text{remainder}$
4. Display the value of a as the GCD.
5. Stop.

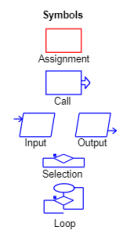

Sample Input

a = 12

b = 8

Sample Output

GCD = 4

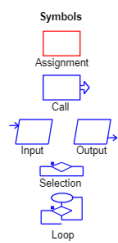

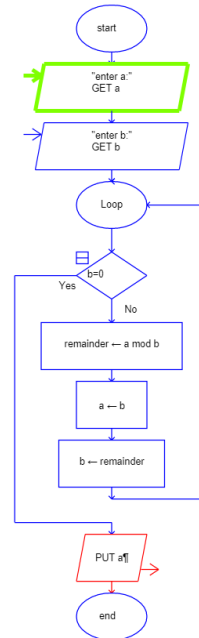

main

Input

"enter a:"

12

Done

main

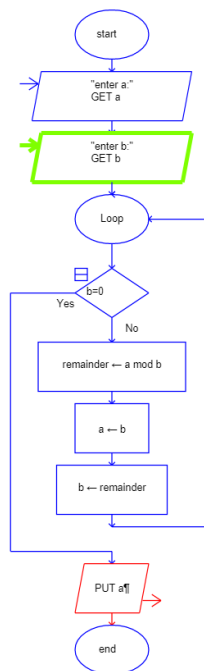

Input

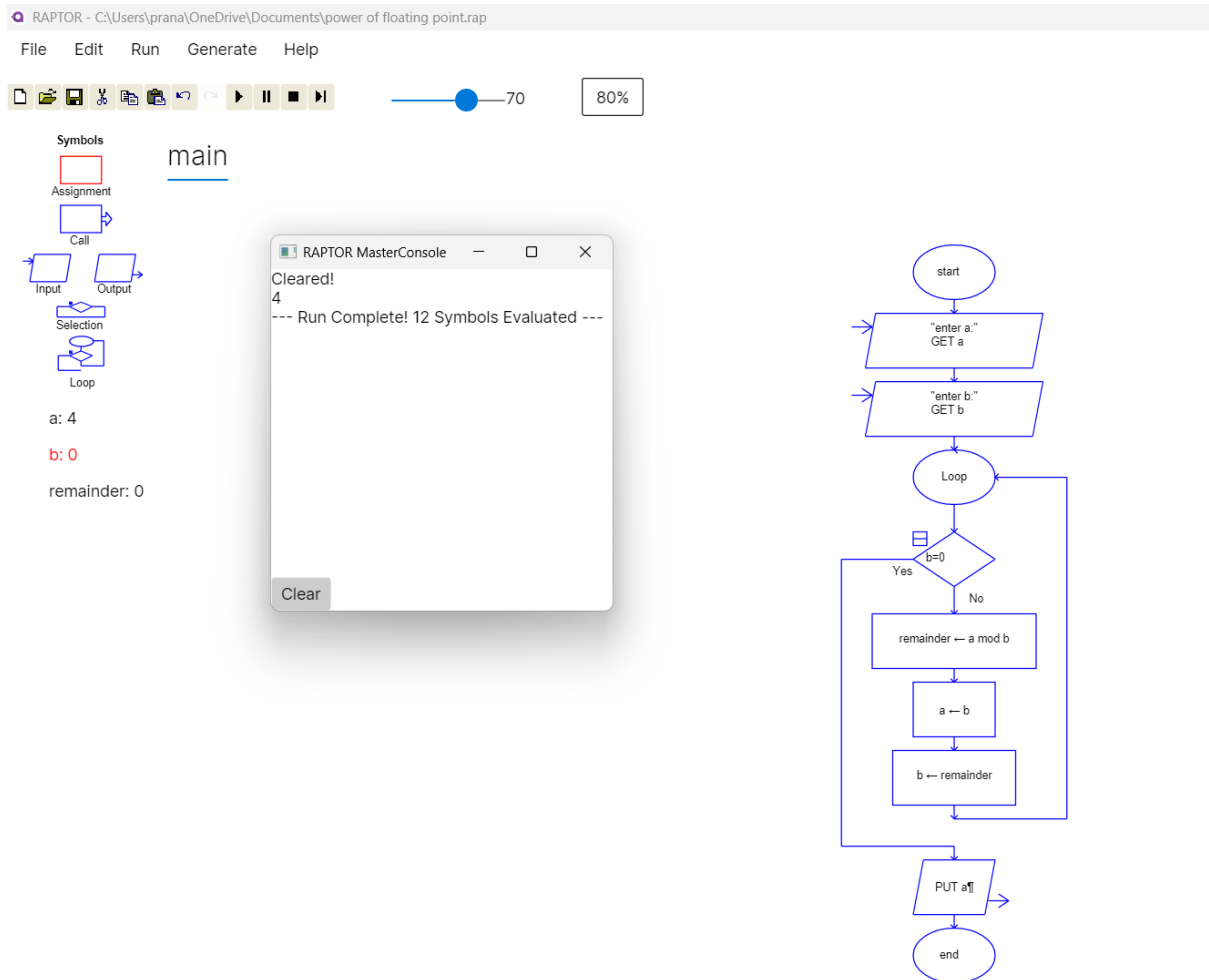

"enter b:"

8

Done

a: 12

Result

The Greatest Common Divisor (GCD) of the given two numbers was calculated successfully using RAPTOR.
